PROFILE

Passionate AI Engineer with years of experience in data management, project coordination, and system administration. I have spearheaded numerous client integration projects, process automation, optimised business processes that boosted annual sales by \$3 million. With a strong ability to enhance data efficiency, build robust client relationships, I am excited to take on a new journey where I can continuously learn, grow, and embark on new technologies, embrace new challenges every day.

EXPERIENCE

AI Platform Developer - Ace Tutoring, West Perth

Mar 2026 - Present

- Designed and integrated AI-driven solutions, including deploying local LLMs to support automation, communication, and email generation.
- Integrated third-party APIs and cloud services, including Microsoft Azure and Cellicast to support data synchronisation, communication systems, and marketing operations.
- Developed automation systems for marketing campaigns, including AI-generated campaign messaging.
- Configure and manage cron jobs and scheduled tasks for automated data processing, reporting, and workflow execution.
- Improved business efficiency by identifying repetitive manual processes and implementing scalable automation solutions.
- Collaborated with team members and stakeholders to analyse business needs and recommend process improvements through automation and technology solutions.

System Administrator (Project Officer) - Everability Group, Victoria Park Jan 2025 - Jun 2025

- Supported client liaison officers to identify billing issues in Penelope Client Management System (CMS), correct errors, and respond to invoicing-related queries from the finance team, including reprocessing invoices sent to incorrect funders.
- Managed user access in the CMS by setting up and deactivating user and patients accounts and aligned fund management policies, covered services, and templates.
- Monitored fund statuses and communicated when funding is exhausted, checked for early plan review indicators, and ensured funder and policy terms are up to date and accurate.

Sales and Data Support Officer - ATOM Supply, Kewdale

Jun 2023 - Dec 2024

- Managed ATOMwear solution portal by updating product catalogues, user access and permissions, and overseeing digital inventory and resource allocations to support efficient client operations.
- Monitored support inboxes, completing tickets through HubSpot CRM and Jira, and delivering timely, customer-focused resolutions.
- Collaborated with internal and external stakeholders—including developers, account managers, procurement, logistics, and IT teams—to ensure solutions met client requirements and aligned with organisational standards.
- Demonstrated strong business analytics capabilities by extracting, interrogating, and validating data to support compliance, reporting, and strategic planning.

Console Operator - AMPOL Service Station, Subiaco

Oct 2021 - Jun 2023

- Operated console and point-of-sale (POS) System operations successfully; control inventory levels, the first-in, first-out (FIFO) approach, and payoffs for EFTPOS and cash purchases.
- Accomplish periodic inspections to avoid expired goods/products to be sold.

Nigh fill Team Member - Woolworths SMKT, Balcatta

Jan 2020 - Jun 2022

- Operated equipments such as hand trucks and pallet jacks
- Keeping the store clean and safe for customers and employees.
- Following all safety and security procedures and other duties as assigned by management.

Marketing Specialist - Catena Systems and Solutions, Bangladesh

Feb 2016 - Aug 2017

- Produced contents for marketing campaigns, including developing video concepts, graphics design, and coordinating multimedia assets to promote products and increase audience engagement.
- Led Product photography projects and gave direction in making review-style video contents, overseeing shot composition, lighting, visual storytelling, and on-screen presentation to create compelling promotional materials.

ACHIEVEMENTS

- Led over 30 client integration projects, streamlining ERP and EDI processes that significantly improved operational efficiency and supported \$3 million in annual sales growth.
- Developed analytical models and dashboards for operational data and customer insights to support decision-making and route optimisation tasks.
- Managed projects involving process automation, large language models, prompt engineering and optimising workflows, demonstrating a strong commitment to technological innovation.

TECH STACK

Python, JavaScript, SQL	Hubspot CRM	API Integration
Jira Service Management	Adobe Commerce / Magento	Workflow Automation
Motherload ERP	Penelope CMS	AI Agent Orchestration
Microsoft 365	SAP Analytics Cloud	Prompt Engineering
Power BI	Xero (Invoicing)	AUTOMATIC1111
	Micronet Systems	OpenClaw
