

Rezaul Khan

AI and Automation | Data Engineer

Mobile: 0449695807 | Email: khanrezaul77@gmail.com | Perth WA 6000 | web: rkhan77.github.io

PROFILE

Passionate AI and data engineer with years of experience in data management, project coordination, and system administration. I have delivered integration projects, automated processes and implemented AI solutions in real scenarios. I have a strong ability to enhance data efficiency and build robust client relationships. I am excited to take on a new journey where I can continuously learn new skills, grow, and embark on new technologies, embrace new challenges every day.

EXPERIENCE

AI Platform Developer (Contract) - Ace Tutoring, West Perth *Dec 2025 - Aug 2026*

- Designed and integrated AI-driven solutions using docker, local LLMs, MCP (Model Context Protocol), AI Agents, multi-agent orchestration, prompt engineering and tool/function calling for automated communication and content generation.
- Developed and optimised AI prompts, structured outputs and agent workflows to improve reliability, context management, information extraction and business process automation.
- Integrated APIs, AI services and cloud platforms including Microsoft Azure and Cellcast to enable data synchronisation and communication across multiple business solutions.
- Built automated workflows using n8n, cron jobs and API integrations for data processing, reporting, marketing campaigns and repetitive business processes.
- Worked with directors and stakeholders to analyse business needs and implement AI, automation and technology solutions that improved operational efficiency and streamlined workflows.

Project Officer (Contract) - Everability Group, Victoria Park *May 2025 - Nov 2025*

- Administered Client Management Systems (CMS), maintaining client records, configuring service schedules, and aligning approved services with funding allocations and plan requirements.
- Investigated and resolved CMS billing discrepancies, validated service data, corrected invoicing errors, and coordinated invoice reprocessing with client liaison officers and finance teams.
- Monitored funding balances, service utilisation, and plan expiry dates within the CMS, identifying funding exhaustion risks and early plan review requirements while maintaining accurate funder and policy records.

Sales and Data Support Officer - ATOM Supply, Kewdale *Jun 2023 - Mar 2025*

- Utilised in house built ERP solutions integrating online domains and performed Electronic Data Interchange (EDI) tasks to ensure seamless data transactions.
- Monitored multiple support inboxes, resolved support tickets using HubSpot CRM and managed technical issues on Jira.
- Collaborated with IT manager, system developers, account managers, procurement and logistics, to deliver fast and efficient user experience.
- Monitored system logs, investigated and resolved backend data-related issues, and maintained data accuracy to support seamless system integrations and optimal system performance.

ACHIEVEMENTS

- Improved business efficiency by identifying repetitive manual processes and implementing scalable automation solutions.
- Delivered over 30 B2B client integration projects (ATOMwear), streamlining ERP and EDI processes that significantly improved operational efficiency and supported in annual sales growth.

Projects

The Good Press | AI Engineering & App Development | url: goodpress.au

- Developed an AI-powered news platform featuring positive news discovery, AI-generated headlines and summaries, and automated content categorisation.
- Engineered a multi-agent AI pipeline for source research, fact-checking, social sentiment analysis, article generation, classification, and duplicate detection.
- Integrated LLMs, n8n automation, web research and scraping tools, and Supabase to streamline content processing, data validation, and publishing workflows.

FriendCircle | Web Development & System Integration | url: rkhan77.github.io/FriendCircle/

- Developing a location-based social and restaurant discovery platform featuring interactive maps, restaurant listings, and exclusive dining discounts to connect users with local businesses.
- Designing user-friendly web interfaces and location-based discovery features to simplify restaurant searches and improve the dining experience.
- Building a scalable digital platform connecting users and restaurant partners, with plans for expansion to mobile applications and Google Play distribution.

TECH STACK

Python	AI Development	Hubspot CRM
JavaScript	Multi Agent Orchestration	Adobe Commerce
SQL	Prompt Engineering	Penelope CMS
Docker	LMstudio	Micronet Systems
Supabase	Large Language Models (LLMs)	Jira Service Management
Microsoft Azure	API Integrations	Microsoft Dynamics 365

ACADEMICS

Master of Management Information Systems (Major in ICT)

2020- 2022

Edith Cowan University

- Academic excellence in Programming (Python, Javascript & SQL) and Project Management.
- Relevant courseworks in Business Process Management (BPMN), Data Analysis and Systems Design.

Bachelor of Business Administration (Major in Marketing)

2013 - 2017

Southeast University

LEARNING & ACTIVITIES

- **Certifications:** IBM Python for Data Science, AI & Development - Coursera, Python Programming Certification - Programming Hub, SAP Technical Consulting Virtual Internship - Forage
- **Activities:** Workshop host at Mandurah Photography Group and City Swan Photography Group, Volunteered at Sustainable Festival organised by ENACTUS ECU, Member of ECU Robotics and Australian Computer Society (ACS)
